NUCLEAR REGULATORY COMMISSION

[Docket No. 72-8 (50-317/318)]

Baltimore Gas and Electric Co.; Issuance of Amendment to Materials License SNM-2505

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 1 to Materials License No. SNM-2505 held by Baltimore Gas and Electric Company for the receipt and storage of spent fuel at the Calvert Cliffs Nuclear Power Plant in an independent spent fuel storage installation (ISFSI), located in Calvert County, Maryland. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications in the license to exempt the first two dry shielded canisters (DSC) (Serial Nos. BGE 24P-R011 & BGE 24P-R002) from the Technical Specification limits on the vacuum drying process. The safety evaluation report on the amendment demonstrates that the first and second DSC meet the design criterion. The report also demonstrates that there is reasonable assurance that the public health and safety will not be endangered by activities authorized under this amendment and that the amendment will not have a significant impact on the human environment.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. In accordance with 10 CFR 72.46(b)(2), prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration. Interested persons may request a hearing on whether the action should be rescinded or modified.

The Commission has determined that the issuance of the amendment will not result in any significant environmental
